

CUSTOM DESIGNED CONTROL AND INSTRUMENTATION SOFTWARE

AERODYNAMIC TEST EQUIPMENT

From nearly two decades of experience in wind tunnel test equipment, Aerotech has developed a control and data acquisition system to complement all of its product range. The systems are configured in a modular format to allow the user to choose the extent of his requirements, enabling us to interface with existing equipment or to provide a complete turnkey project.

FEATURES:

- Custom Designed and Manufactured Data Acquisition and Motion Control Systems
- PC based or multi-user systems
- Update and Refurbishment of Existing Facilities
- Stand Alone or Integrated into user's existing equipment
- Modular Software Packages configured to suite user's requirements
- Multi-axis aerodynamic force data
- Multi-axis model motion control systems
- Multi-axis calibration systems
- Computer Management of Multi Port Pressure Scanning Devices
- Graphical presentation of acquired data in near real time
- Complete Wind-Tunnel Management and Control Systems
